acciaio inox stainless steel

L'acciaio è la materia prima delle nostre cucine, da plasmare per esaltarne la funzionalità e da ammirare per il piacere degli occhi.
Steel is the raw material we use in our kitchens, shaped to highlight its functionality and admirable for its sheer beauty.

prezioso I prodotti Alpes sono trattati con satinatura "argento" per esaltare le loro forme con la tonalità lucente tipica del metallo prezioso.

elegante La bellezza dell'acciaio inox ben si abbina ad ogni tipo di materiale ed a ogni stile progettuale.

pratico Ben lungi dai luoghi comuni, l'acciaio è facile e pratico da pulire. Le superfici inox non si deteriorano dopo frequenti lavaggi, perché non presentano rivestimenti superficiali di protezione, come invece molti altri materiali.

duraturo La resistenza all'azione di detergenti, solventi e disinfettanti consente un'azione energica e accurata durante la pulizia. L'acciaio è un materiale anticorrosivo e resistente agli shock termici e mantiene inalterati il suo aspetto e le sue caratteristiche per decenni.

igienico La compattezza superficiale e priva di porosità dell'acciaio indica che non rilascia e non assorbe sostanze di alcuna natura. Non si scheggia, non si usura, non si incrina e non si deteriora, impedendo la formazione di discontinuità superficiali che si trasformerebbero in ricettacoli per germi e sporcizia.

precious Alpes products are treated with a "silver" satin finish to highlight their forms with the typical luster of precious metal.

elegant The beauty of stainless steel is a fine match for any type of material and any design style.

practical Contrary to commonly-held notions, steel is practical and easy to clean. Stainless steel surfaces do not deteriorate after frequent washings, because they do not have protective surface treatments, like many other materials do.

lasting Their resistance to detergents, solvents and cleaners allows a precise and energetic cleaning action. Steel is a non-corroding material that resists thermal shock and whose appearance and characteristics remain unaltered for decades.

hygienic The compact and non-porous surface of steel proves that it neither releases nor absorbs substances of any kind. It does not chip, it does not wear down, it does not crack and does not decay, preventing the formation of irregularities in the surface that could create pockets of bacteria and dirt.

pulizia dei materiali cleaning the materials

_acciaio inox

cosa non fare Non pulire i piani d'acciaio con pagliette, spazzole metalliche, detersivi abrasivi o in polvere che possano intaccare la superficie liscia, rigandola irrimediabilmente. Assolutamente da abolire i detersivi a base d'acido clorico, fluoridrico, fosforico e muriatico. Anche il semplice contatto dei loro vapori acidi può avere un'azione ossidante e corrosiva sull'acciaio inox! Lo stesso vale per acidi a base d'ipoclorito di sodio, candeggina o ammoniaca, contenuti generalmente nei detersivi per l'igiene della casa.

cosa fare Il sistema più efficace è sempre il più semplice. Tutte le superfici d'acciaio inox vanno trattate con acqua e sapone, o detersivo neutro, risciacquate abbondantemente e asciugate con un panno morbido. I depositi di **calcare** e d'acqua stagnante si eliminano con creme detersivi specifiche per l'acciaio, oppure con una soluzione casalinga di acqua calda mista ad aceto bianco, risciacquata a sua volta da acqua pulita. Si asciuga con cura e del calcare si è persa ogni traccia. Il rimedio migliore per rimuovere **olio e grasso** è utilizzare un prodotto liquido per piatti diluito con acqua molto calda. Sciacquare e asciugare con un panno morbido. Sulle macchie più ostinate ripassare con un panno imbevuto d'alcool.

_corian®

Atossico e non poroso, il Corian® offre caratteristiche che lo rendono ideale per i piani di lavoro. Facile da pulire e mantenere in buone condizioni, Corian® evita la proliferazione di muffe e batteri.

per la pulizia quotidiana utilizzare un panno umido con una crema abrasiva leggera o un comune detersivo. Agire sempre con un movimento circolare. Anche se i liquidi non possono penetrare all'interno del Corian®, è meglio eliminarli subito.

Macchie prodotte da caduta di liquidi come aceto, caffè, tè, succo di limone, coloranti, ketchup, vino rosso o oli vegetali: prima passare un panno umido con una crema abrasiva leggera e poi usare progressivamente una spugna abrasiva e un detersivo o una soluzione per la pulizia delle superfici a base di ammoniaca. Solo in presenza di macchie particolarmente tenaci o di un graffio significativo sarà possibile utilizzare una spugna abrasiva con della candeggina. Risciacquare parecchie volte con acqua calda ed asciugare con un panno morbido. Per ridare l'aspetto originale passare un panno umido e una crema abrasiva leggera sull'intera superficie del piano con un movimento circolare.

Calore non posare mai tegami caldi o roventi direttamente sul piano di lavoro di Corian®.

Graffi come qualsiasi materiale, presenterà leggeri segni di abrasione a seguito del normale uso quotidiano. Evitare di tagliare o tritare direttamente su Corian®.

Le macchie accidentali di sostanze chimiche come sverniciatori, prodotti per la pulizia dei metalli o dei forni, prodotti contenenti cloruro di metilene, acidi, prodotti a base di acetone, ecc., devono essere prontamente eliminate con una abbondante quantità di acqua e sapone.

_ceppi in legno

Il ceppo di legno va pulito esclusivamente con un panno umido.

Il trattamento ideale idrorepellente sarebbe spalmare periodicamente il legno con olio ad uso alimentare, al fine di limitarne l'assorbimento d'acqua senza alterare le proprietà organolettiche dei cibi che ne vengono a contatto. Il sole o le fonti di calore a diretto contatto con il legno possono alterarne il colore.

_stainless steel

what not to do Do not clean steel surfaces with steel pads, metal brushes, abrasive or powder detergents that could damage the polished surface, scratching it irreparably. Absolutely prohibited are detergents based on chloric, hydrofluoric, phosphoric and muriatic acids. The mere contact of their acid vapors can have an oxidizing and corrosive action on stainless steel! The same is true for acids based on sodium hypochlorite, bleach or ammonia, generally present in detergents for the home.

what to do The most effective system is always the simplest. All steel surfaces should be washed with soap and water, or neutral detergents, rinsed with abundant water and dried with a soft cloth. **Lime** deposits and stagnant water may be removed with specific cream detergents for steel, or with a home-made solution of warm water and white vinegar: clean then rinse with clean water. Dry carefully and there will be no more trace of lime. The best remedy to clean **oil and grease** is to use liquid dish soap diluted with very hot water. Rinse and dry with a soft cloth. The most stubborn stains may be removed with a soft cloth imbued in alcohol.

_corian®

Corian® is non-toxic and non-porous, just two of the characteristics that make it ideal for worktops. Easy to clean and keep in good condition, Corian® prevents the proliferation of mould and bacteria.

For everyday cleaning, just use a damp cloth and a mild cream abrasive cleanser or a common household degreaser. Always clean using a circular motion. Although liquids cannot penetrate Corian®, it is best to wipe up spills as they occur.

Common household spills, such as vinegar, coffee, tea, lemon juice, dyes, ketchup, red wine or vegetable spills: First, try to clean with a damp cloth and a mild cream abrasive, then progress with an abrasive plastic scouring pad and a detergent or an ammonia based hard-surface cleaner. Only with a really persistent stain as lily pollen, or saffron, or with a light scratch, should you need to resort to an abrasive plastic scouring pad and rub over the stain with some bleach. Rinse several times with warm water and dry with a soft cloth. Always restore the overall luster afterwards, using a damp cloth and a mild cream abrasive cleaner and blend the scrubbed area into the entire surface by rubbing in a circular motion.

Heat Never put hot pans directly on a Corian® top.

Scratches Like all materials it will develop slight abrasion marks in normal daily use. Never cut or chop on Corian®.

Accidental spills of strong chemicals (e.g. paint stripper, brush cleaners, metal cleaners, oven cleaners, cleaners containing methylene chloride, acid drain cleaners, acetone-based nail varnish removers etc.) should be flushed promptly with plenty of soapy water to avoid damaging worktops.

_wood chopping board

The wood chopping board should be cleaned exclusively with a damp cloth.

The ideal waterproofing treatment would be to periodically treat the wood with food oil, so that it limits the absorption of water without altering the organic properties of the food that comes into contact with it.

The sun and other heat sources in direct contact with the wood can alter its colour.

condizioni generali di vendita

general sales condition

I prezzi del presente listino sono espressi in Euro e non sono comprensivi di I.V.A.

The prices in this list are in Euros.
The VAT is not included

Con la trasmissione dell'ordine il cliente accetta tutte le condizioni contenute nei seguenti articoli:

1. tutti i prezzi, misure, descrizioni pubblicati nel presente listino possono essere variati o annullati in qualunque momento e senza preavviso, in base alle esigenze tecniche e commerciali di Alpes-Inox S.r.l. e ciò senza possibilità di rivendicazioni da parte dell'acquirente;
2. Alpes-Inox S.r.l., in qualsiasi momento e senza preavviso, si riserva il diritto di non produrre più alcuni articoli di gamma;
3. i termini fissati per la consegna non sono tassativi e in nessun caso possono giustificare ritardi di pagamento o dare luogo a risarcimento di danni;
4. l'imballo è eseguito con scatole di cartone e gabbie in legno gratuite;
5. la merce è venduta franco fabbrica e viaggia sempre a rischio e pericolo del committente. La spedizione verrà effettuata nel modo ritenuto più opportuno senza che ciò possa dar luogo a reclami di sorta. In modo tassativo non verranno riconosciuti e accordati bonifici, sostituzioni, accrediti, ecc. per ammanchi, rotture o altro, in dipendenza dei trasporti o imballi poichè ogni spedizione deve intendersi eseguita per ordine e conto del cliente. La verifica della qualità e del tipo di merce deve essere fatta dal compratore alla consegna. Qualunque richiesta o contestazione da parte del destinatario in ordine a quanto sopra ed anche per il caso di ritardi o disguidi, deve essere rivolta direttamente ai vettori responsabili;
6. vengono considerati liberatori soltanto i pagamenti in valuta legale, o con altro mezzo convenuto, esclusa ogni riduzione o arrotondamento, alle scadenze stabilite nelle fatture. In caso di ritardato pagamento, verranno addebitati gli interessi di mora. Detti interessi decorreranno dal giorno successivo alla scadenza, senza bisogno di particolari diffide. È facoltà di Alpes-Inox S.r.l. sospendere le consegne, o annullare ordini già accettati, qualora i pagamenti non vengano effettuati alle scadenze stabilite. Contestazioni di qualunque genere non danno diritto a differire o sospendere i pagamenti;
7. le condizioni di garanzia sono riportate nel certificato inserito nella confezione corrispondente ad ogni apparecchiatura;
8. per qualsiasi contestazione è sempre e solo competente l'Autorità Giudiziaria di Bassano del Grappa (VI).

Il presente listino annulla e sostituisce ogni precedente listino, offerta o comunicazione di prezzo sia verbale che scritta.

Upon placing the order, the customer accepts all the conditions specified in the following clauses:

1. All prices, measurements and descriptions contained in this price list can be changed or cancelled by the manufacturer at any time without prior notice, according to the technical and commercial needs of Alpes-Inox S.r.l., and without the possibility of claims from the buyer.
2. Alpes-Inox reserves the right to stop production of any article, at any time and without prior notice.
3. The delivery terms are not binding and in no case shall they justify delays in payment or lead to claims for damages.
4. Packaging is done in cardboard boxes and wooden crates, free of charge.
5. The goods are sold ex-works and travel at the purchaser's risk. The shipping will be done in the most suitable manner and no claims will be acknowledged. No compensation, replacement or credit will be granted for any shortfall, damage, breakage or other loss arising out of the carriage or packaging, since each shipment shall be considered carried out upon the customer's order and on his/her behalf. The purchaser shall check the quality and type of goods immediately upon receipt. Any requests or complaints whatsoever by the consignee regarding the above or in case of delays or inconvenience, must be directly addressed to the carriers.
6. Only payments made in legal currency or by other means previously agreed upon are considered as redeeming on the deadlines stated in the invoice, excluding any price reductions or rounding off. In case of delayed payment, overdue interest will be charged. Said interest will start as from the day following the due date, without any notice by the seller being required. It is the right of Alpes-Inox S.r.l. to stop delivery or cancel any orders already accepted in case payments are not made according to the agreed due dates. No claims whatsoever shall give the purchaser the right to defer or stop payments.
7. The warranty conditions are stated in the certificate enclosed in the package.
8. For any controversy, competent jurisdiction lies with the Court of Bassano del Grappa, Vicenza, Italy.

This price list cancels and replaces any previous price list, offer or price communicated either verbally or in writing.
